

Passport™ Everon-V Amplifier

The Everon-V amplifier accepts all three major manufacturer's headsets including VXI, Plantronics® and GN Netcom®. The included headset connection cord connects to VXI Passport-V or VXI TuffSet™ headsets. There are two additional headset ports to accommodate either Plantronics or GN Netcom headsets (Plantronics and GN Netcom headset connection cords are sold separately).

Enjoy reliable performance and extended product life in the most demanding telephone use environments. Easily installed, the Everon-V is compatible with all corded telephones (number pad on base, not handset). Set up procedure is accomplished with just two compatibility switch settings. Marathon battery life delivers 250 days of operation, Safe Sound Protection provides hearing protection on receive and Tru-Mic noise suppression circuitry further eliminates background noise when the operator is not speaking.
